Art Unit: 1624

DETAILED ACTION

Claims 1-15 are pending in the application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to the process of preparing the compounds of formulae (X), (XI) and (XX) where n=0.

Group II, claim(s) 1-10, drawn to the process of preparing the compounds of formulae (X), (XI) and (XX) where n=1.

Group III, claim(s) 1-10, drawn to the process of preparing the compounds of formulae (X), (XI) and (XX) where n=2.

Group IV, claim(s) 1-10, drawn to the process of preparing the compounds of formulae (X), (XI) and (XX) where n=3.

Group V, claim(s) 11, drawn to the compounds of formulae (VIIb) and (VIIb-1).

Group VI, claim(s) 12, drawn to the species.

Group VII, claim(s) 13, drawn to the compounds of formula (VId).

Group VIII, claim(s) 14, drawn to the compounds of formula (V).

Group IX, claim(s) 15, drawn to the compounds of formulae (III) and (IV).

The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions of

Application/Control Number: 10/582,414

Art Unit: 1624

Groups I-IV are drawn to structurally dissimilar compounds. They are made and used independently. One does not require the other for their use. If, say, the process of preparing the 4-oxo-pyrimido[1,2-a]azepine of Group III, were anticipated, applicants would not acquiesce in the objection of any of the Groups I, II or IV there over or viceversa and, thus, they are not linked to the same or corresponding special technical features.

The inventions I-IV and V-IX are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful to prepare other substituted heterocycles and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Application/Control Number: 10/582,414

Art Unit: 1624

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda L. Coleman whose telephone number is 571-272-0665. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson can be reached on 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
